REPORT  
OF THE  
GENERAL COMMITTEE OF GOVERNORS  
OF ST. LUKE'S HOSPITAL,  
FOR THE YEAR 1858.

---

*To the Court of Governors of St. Luke's Hospital.*

In their last Report, your Committee directed attention to the insufficiency of the Annual Income, as compared with the expenditure required to maintain the efficiency and usefulness of the Charity, shewing an excess of expenditure of upwards of £2000, to meet which, they were compelled to sell a further sum of £2,000 Stock of the Consolidated 3 per Cent. Annuities, making a total of £17,025 Stock, sold since the Centenary in 1851. And although your Committee are enabled this year to report an increase in the amount of benefactions of £484 over those of 1857, yet there appears an excess of expenditure over income during the past year of £1,058. 19s. 9d.

Your Committee in the month of March last, appointed a Sub-Committee to enquire into the Financial condition of the Hospital, and on reference to their Report it will be seen that the total Average Annual increase of Expenditure, under the head

of "*House Expenses*" during the three years ended 31st December, 1857, as compared with the Expenditure during the three years ended the 31st December, 1850, amounted to £2,200. 9s. 10d. The Average Annual Expenditure, under the head of "*House Expenses*" for the three years ending 31st December, 1857, was £6,019. 4s. 6d.; the Expenditure under the same head during the past year, has been £5,805. 9s. 1d.

With a view to increase the Income, and at the same time to extend the benefits of this Charity to the unfortunate class of Patients who may be deemed *incurable*, and whose re-admission at 7s. per week had been discontinued in conformity with the recommendation of the Sub-Committee, Your Committee, subject to the approval of the General Court, have recently allowed the re-admission of such Patients whose friends are able and willing to contribute 21s. per week towards their maintenance. A great benefit may thereby be conferred upon a class of persons who may not be in a position either to bear the expenses of a Private Asylum, or to engage the services of a separate Attendant for the Patients at their own homes; whilst the admission of such, together with that of *curable* Patients, on payment of a like sum as authorized by the General Court, of 24th February last, may be calculated ultimately to relieve the Hospital of somewhat of its present financial pressure, although it must be remembered that the Income derivable from such sources, must necessarily be small and at the same time fluctuating and precarious.

Numerous alterations yet remain to be effected in the Building to complete the efficiency of its internal arrangement, as well as to improve its external appearance; but however greatly they may be needful and desirable, your Committee are reluctantly compelled to defer making such alterations, until sufficient Funds be placed at their disposal for that purpose;—being unwilling further to encroach upon their Funded Property.

Since the last Annual Court, the Commissioners in Lunacy have made their usual Official visit to the Hospital, pursuant to Sec. 61 of the Act 8 & 9 Vic., Cap. 100. In their observations, dated 12th March, 1858, recorded in the "*Visitors' Book*," kept for that purpose, are some suggestions for further improvements; and in concluding their Report, they express their approval of

the admission of Patients whose friends are able and willing to contribute towards their maintenance in the Hospital.

Your Committee announce with regret, the deaths of HENRY FREDERICK STEPHENSON, Esq., and CHARLES RANKEN, Esq., late Members of the Committee; and the resignation of JOHN LAVICOUNT ANDERDON, Esq., and that of CLAUDE GEORGE THORNTON, Esq., from whose zealous exertions on behalf of the Hospital, many contributions have been made to its Funds.

In order to obviate the difficulty that may arise in obtaining an adequate attendance at their Monthly Meetings, in consequence of the List of Governors forming the General Committee, being suddenly reduced by resignations and deaths, Your Committee have agreed to the following Resolution.

“That it be recommended to the next General Court, that  
 “ Article 12 of the General Regulations for the Government of  
 “ the Hospital, should be altered, so as to allow of vacancies in  
 “ the General Committee being filled up from time to time by  
 “ the General Committee.”

With respect to supplies for the past year, Your Committee contracted from the 1st April, until the 30th September last, for the usual kinds of Butcher's Meat at 4s. 7d. per stone of 8 lbs.; and have further contracted from the 1st October last until the 31st March next, for the same, at the rate of 4s. 4d. per stone of 8 lbs. Your Committee contracted from the 1st April until the 30th September last, for the best wheaten bread at 6d. for a 4 lb. loaf; for flour at 9s. per bushel; and for oatmeal at 2s. 3d. per peck; and have further contracted from the 1st October last to the 31st March next, for the best wheaten bread at 6d. for a 4 lb. loaf; for flour at 9s. per bushel; and for oatmeal at 2s. 4d. per peck.

As regards the patients admitted to the benefits of this Charity, your Committee report that there have been received into the Hospital since the 31st December, 1857, and up to the 31st December, 1858, 135 patients deemed curable.

During the same period, there have been discharged cured 82; uncured 36; as unfit 3; at the request of their friends 6; and there have died 8. Since the 30th July, 1751, the day on which the Hospital was first opened for the reception of Patients, and up to the 31st December 1858 inclusive, there have been

admitted into the Hospital 19,463 patients, DEEMED CURABLE ON THEIR ADMISSION; of whom there have been discharged.

<hr/>	
TOTAL ... ..	19,463
<hr/>	

Since the opening of the Hospital in 1751, and up to the 31st of December, 1858, there have been re-admitted 760 patients DEEMED INCURABLE, who had been previously discharged *uncured*, *exclusive* of those patients (nine in number) who have, from time to time, been re-admitted, by virtue of an Annuity Deed (dated 11th June, 1788) of the late Samuel Whitbread, Esq.; and since the 31st December, 1857, and up to the 31st December 1858—four patients, *deemed incurable on re-admission*, have been discharged at the request of friends; 2 friends not complying with rules; 6 upon trial; 4 have died; and 11 have been re-admitted.

Of the said 760 patients (re-admitted as Boarders) *exclusive* of the Whitbread patients,—

107 have been discharged by the desire of friends.

40 have been discharged cured.

6 upon trial.

19 uncured.

9 by order of the Committee, being Paupers.

29 in consequence of the friends not complying with the Rules of the Hospital.

5 being deemed, in point of circumstances, improper objects for the Charity.

464 have died, and

81 were in the Hospital on the 31st December last, *exclusive* of Mr. Whitbread's patient.

---

Total 760

---

The average weekly number of Patients in the Hospital during the year has been as follows, viz.: 64 males and 97 females, total 161.

The total number of Patients remaining on the books on the 31st December, 1858, was 150, namely, 68 Patients deemed curable, and 82 boarders, including Mr. Whitbread's Patient.

Your Committee recommend that the Right Honorable Lord OVERSTONE be requested to continue the honor to this Charity by being its President.

That the Right Honorable the Earl of ABINGDON, the Right Honorable Lord AVELAND; the Right Honorable Viscount EVERSLEY; Sir EDMUND ANTROBUS, Baronet; JAMES BENTLEY, Esq.; and WILLIAM HENRY WHITBREAD, Esq., be re-elected Vice-Presidents of this Corporation.

That HENRY FRANCIS SHAW LEFEVRE, Esq. be re-elected Treasurer.

Your Committee have prepared a List of Governors, whom they submit to the Court as fit and proper persons to act as the General Committee for the year ensuing.

And finally, Your Committee recommend that the remaining Honorary Officers of this Corporation be severally re-elected, pursuant to the regulations.

All of which is nevertheless submitted.

REPORT  
OF THE  
PHYSICIANS AND MEDICAL SUPERINTENDENT,  
FOR THE YEAR 1858.

---

*To the President, Vice-Presidents, Treasurer, and Governors  
of St. Luke's Hospital.*

MY LORDS, LADIES, AND GENTLEMEN,

On reviewing the History of ST. LUKE'S HOSPITAL for the last few years, it occurs to us, as a subject on which we may reasonably congratulate the Governors, that we find ourselves with so few of what have hitherto been the main topics of our Annual Report. Although some few alterations in the Building and Grounds, recommended in our last report, have not been carried out, owing to the want of funds for the purpose, we feel that the Hospital now affords us every facility for the treatment of Acute Insanity, and that the Patients experience all the comfort that their unhappy malady would, under any circumstances, permit them to enjoy.

The great feature of the year's history, has been the reception into the Hospital of Patients, who contribute towards their maintenance. On the 31st of December we had twenty of this class.

As the Patients are grouped together through the various wards, in accordance, as nearly as possible, with their respective social positions—and as all have the advantage of a most liberal dietary, with the addition of such stimulants or other accessories as their cases individually require—no separation or special classification of these contributing Patients has been necessary; in fact, we believe that the reception of Patients among whom anything approaching to a difference of grade is recognised, would endanger the harmony, and materially embarrass the management of the Hospital.

It must be encouraging to the Governors to know, that the friends of this class of Patients have universally expressed satisfaction and gratitude at being able to avail themselves of the privileges so liberally conceded to them by your late regula-

tions; and whenever the matter has been discussed by members of our own profession, the reception of this class of Patients into a Public Hospital has been hailed as a great progress towards the amelioration of the condition of the insane of the middle classes.

In spite of the admissions of the twenty-eight Patients of the above class, (eight had been discharged before the 31st December,) the total number of admissions was below that of previous years.

We had occasion to mention in a former report, this gradual falling off of the applications for admission. For the last five years the admissions have numbered as follows: in 1854—205, in 1855—191, in 1856—175, in 1857—176, and in the year last past—146. The interruption to the gradual descent of the series observable in 1857, was owing to the removal in that year of those Boarders who had become chargeable to Parishes, and the consequent reception of all the Patients whose names were on the uncured list. The admission of Boarders in 1857 was just double the number of admissions of the same class in any of the other years quoted. If we take the admissions of the fresh cases only, the series will better bear out our observation; it would be thus, 196, 177, 163, 150, and 135 for last year.

At the termination of last year we had only 150 Patients in the Hospital, with accommodation for just twice that number. We feel sure that the above statements, taken in connection with the condition of hundreds of the Insane of the lower middle classes, which has recently elicited considerable public expression of feeling, will be quite argument enough to induce you to enquire into the means by which your great spare accommodation may be made most readily available to those requiring it.

We are loth to leave this very important subject without having placed you in possession of all that occurs to us as accounting for the diminution in the number of our Patients. Though it must be apparent to every one, that the class of persons hitherto received into ST. LUKE'S HOSPITAL, has been of late years most abundantly provided for elsewhere, we feel that one other most important cause of this falling off has been, and is, the result of ignorance on the part of the Public, and

even on that of the Medical Profession, of the fact that your Hospital is for all those who require or have just claims to such, being really in straitened circumstances, a perfectly free Hospital for the Insane of the Middle Classes ; and we would beg of you to consider what, if any, means can be taken for bringing this information home to all classes of the community.

The Tables accompanying the Report, will show you that the cures during the past year have been at the rate of 65 per cent. on the number whose treatment has been completed. Those discharged Uncured, 28 per cent.; and the Deaths, 6 per cent. These figures represent as nearly as possible the average for the last five years. Several patients who had become fatuous, and for whom anything like a material amelioration of their condition could not be expected, have been removed at the instance of the Commissioners of Lunacy. There are still a few more such Patients, whose removal would have been desirable, but on consideration of their respective cases, your Committee came to the conclusion, that their removal could not be effected without doing such violence to the feelings of their friends, and inflicting such apparent injustice on relatives who had considered them settled for life in the Institution, that they have been left undisturbed. Of course the removal of such cases which are very troublesome, constantly noisy, and always unsightly, renders the Wards much more comfortable for those whose intelligence is but slightly impaired.

We much regret that all the efforts made to secure for the Hospital the small plot of land belonging to the Almshouses, and which would make such a desirable addition to the Male Airing Court, have been hitherto quite unsuccessful. However, we have endeavoured, as much as possible, to make up for the deficient means of out door exercise within the Hospital boundaries, by extending to their utmost limits the freedom of egress from the Hospital walls. With this view, the Female Attendants in rotation take out for walking exercise four or five Female Patients each morning, and the Female Night Nurse a similar number each afternoon. The Male Attendants being less numerous, it results that those of their Patients who require supervision, do not enjoy quite so much liberty. It can at present only be arranged that four or five should go out twice or thrice a week.

Many of the Male Patients however have been trusted out on parole, and without any untoward result. It will interest the Governors to learn, that by these arrangements more than one-half of the Patients under treatment during the year have reaped the benefit of this extended exercise and change of scene: visiting by turns the Crystal Palace, Zoological Gardens, the British and Indian Museums, the Water Color Exhibition, &c., &c. Some of the Patients are also constantly allowed to spend a few hours, or even the whole day out of the Hospital with their friends. This liberty has materially assisted in disarming the fears of many, that the Hospital was a place of duration from which there was no prospect of deliverance.

In mentioning these increased means of diversion, we should be guilty of ingratitude did we omit to mention the very handsome gift lately made to the Hospital by Edward Walker, Esq., of a complete Scenic Theatre, which your Committee have permitted to be fitted up in a small out-building that has been for some time unused. We hope, and believe that this Theatre will be a great source of enjoyment, and even means of occupation to the Patients.

The general health of the Patients has been remarkably good during the year; and we have no suicide, or casualty of the slightest importance to report. Hardly any changes have taken place in the staff of attendants, and we have reason again to testify to their uniform good conduct and efficiency. Their general appearance and behaviour indeed called forth the encomiums of the Commissioners in Lunacy at their last visit.

In conclusion, we have only to thank you for your patient attention to our various recommendations: and for your ready compliance with them where circumstances permitted you to carry them out.

We have the honor to be,

My LORDS, LADIES, and GENTLEMEN,

Your very faithful Servants,

(Signed) A. J. SUTHERLAND, M.D., *Oxon.*

„ HENRY MONRO, M.B., *Oxon.*

„ HENRY STEVENS, M.D., *Lon., Med. Sup.*

ST. LUKE'S HOSPITAL,

10th February, 1859.

# TABLE OF POST-MORTEM APPEARANCES.

Name.	Age.	Sex and Domestic Condition	Mental Malady.	Duration of Malady.	Concomitant Bodily Affections	Mode of Death.	Date of Post Mortem Examination.	General External Appearance.	Scalp.	Cranium.	Weight of Brain.	C E R E B R A L.		Thorax.	Abdomen.
												Membranes.	Substance.		
E. G. Mc. L.	52	Female. — Single.	Chronic Mania.	31 Years.	Menorrhagia. — Faintings. — Bronchitis.	Syncope.	6th. Feb.	Body in good condition, large quantities of fat covering the abdomen.	Thin.	Dense. No diploe.	40 ozs.	Dura Mater adherent in places & veins much congested.	Sulci well marked; numerous on section. Choroid plexus congested, no cysts. Brain firm; Cerebellum healthy.	Heart tolerably healthy, though pale and unctuous, contained fibrinous clots, and right side full of blood; a little serum, $\frac{1}{2}$ oz. in Pericardium. Lungs healthy.	Liver friable on pressure between finger and thumb. Kidney—left healthy; right, large, flabby—much congested, and cortical substance came away on removing capsule. Gall bladder distended, and contained a large Gall stone. Uterus contained a large cancerous tumour. Stomach and bowels healthy.
J. H. M.	34	Male. — Married.	Mania.	2 Years.	General Paralysis. — Apoplexy.	Coma.	16th Mar.	Body in tolerable condition, one or two cachectic sores on surface, and on hand.		Calvarium with much Diploe asymmetrical.	50 $\frac{3}{4}$ ozs.	Dura Mater easily separable—natural—arachnoid opalescent in patches.	At posterior aspect of left cerebral hemisphere, and on top of left cerebellar ditto was a quantity of effused blood fluid, covering a space of about the size of a 5s. piece. Brain generally anemic on surface, few bleeding puncta on section; left ventricle contained about two drachms of bloody serum—right, about half the quantity, of a pale straw-color. No median band visible. Brain matter firmer than usual. Sp. Gr. 1046.	Heart small, very pale, greasy, and thin, the left ventricle being of the usual substance of the right in an ordinary heart. Lungs healthy. Bronchi free from mucus.	Liver very friable. Kidneys not to be peeled without removal of cortical substance. Other viscera healthy.

Name.	Age.	Sex and Domestic Condition	Mental Malady.	Duration of Malady.	Concomitant Bodily Affections.	Mode of Death.	Date of Post Mortem Examinations.	General External Appearance.	Scalp.	Cranium.	Weight of Brain.	C E R E B R A L.		Thorax.	Abdomen.
												Membranes.	Substance.		
S. B.	60	Female. — Widow.	Melan- cholia.	16 Months, probably many years.	Disease of Heart and Liver.	Syn- cope.	24th. March	Body very much ema- ciated. Superficial veins much distended, especially about upper part of Thorax.	Very thin, firmly attached to Cranium.	Calvarium sym- metrical, very thick; much diploe.	45 ozs.	Dura Mater se- parated readily; very dense. Arach- noid healthy, ves- sels much congest- ed.	Grey matter very pallid. Median band well marked. White matter very soft, especially at Corpus Callosum. Septum lucidum broken down. Nor- mal fluid in ven- tricles. Choroid plexus without cysts. Sp. gr. of the cerebral matter 1033.	Heart — right auricle immensely distended, and very thin, full of fluid blood, as also was the right ventricle, which was also very thin; left side more muscular, but whole organ very pale and badly nourished. Superficial Cardiac veins enormously distended. Peri- cardium contained $\frac{1}{2}$ oz. of fluid. Lungs slightly em- physematous, but otherwise healthy.	Liver very pale and friable. Gall- bladder very large, contained several Gall-stones; com- mon duct much dis- tended (? pervious). Stomach and bowels healthy. Kidneys much congested. Other viscera heal- thy.
W. H.	37	Male. — Married.	Mania.	1 Month.	General Para- lysis. — Phleg- monous. Erysi- pilas.	Cona.	22nd April.	Body well nourished.	Natural.	Calvarium thick; much diploe.	56 ozs.	Dura Mater some- what adherent in places. Some few spiculae of bone de- veloped on internal surface. Men- branes engorged.	Brain natural; few bleeding punc- ta on section. La- teral ventricles con- tained more fluid than usual. Cho- roid without cysts.	Heart healthy. Lungs healthy.	Liver—greasy, unctuous, friable, mottled. Gall- bladder twice the natural size, dis- tended with biliary matter. Stomach and bowels healthy. Kidneys — cortical substance separated with capsule on peeling. Other vis- cera healthy.

TABLE OF POST-MORTEM APPEARANCES—continued.

Name.	Age.	Sex and Domestic Condition	Mental Malady.	Duration of Malady.	Concomitant Bodily Affections	Mode of Death.	Date of Post Mortem Examination.	General External Appearance.	Scalp.	Cranium.	Weight of Brain.	C E R E B R A L.		Thorax.	Abdomen.
												Membranes.	Substance.		
E. M.	62	Male. — Married.	Melan- cholia.	Four Months.	Disease of Heart. — Asthma. — Carbuncle	Coma.	24th April.	Body very well nourished.	Externally; right side occupied ex- tensively by carbuncle & deficient in surrounding places, and sloughing, cellular tis- sue & mus- cular sub- stance. There were several col- lections of pus.	On reflect- ing scalp, pericranium was found deficient in places, and the bone soft underneath. Calvarium asymmet- rical, thick; There were much diploe	50 oz.	Dura Mater very adherent to cal- varium. Mem- branes healthy.	Brain bloodless; very few bleeding puncta on section. Brain generally soft and spongy; ven- tricles contained fluid. Choroid natural. Sp. Grav. of cerebral matter 1047.	Heart almost pul- taceous; contained fibrinous clots. Lungs emphysema- tous; no adhesions to pleura.	Liver friable, slightly mottled. Gall bladder full of stones. Kidneys very large and flab- by; cortical sub- stance very easily separable. Other viscera healthy.

Name.	Age.	Sex and Domestic Condition	Mental Malady.	Duration of Malady.	Concomitant Bodily Affections.	Mode of Death.	Date of Post Mortem Examination.	General External Appearances	Scalp.	Cranium.	Weight of Brain.	C E R E B R A L.		Thorax.	Abdomen.
												Membranes.	Substance.		
S. J. M.	33	Female. — Single.	Acute Dementia.	Eight Months.	Disease of Heart. — Gastric Fever. — Disease of Kidneys.	Coma.	5th July	Body well nourished. Fat.	Scalp very firmly adherent.	Calvarium very dense in structure, & unusually thick. Symmetrical.	38½ oz.	Dura Mater easily separable; thick. Arachnoid + quite transparent; much sub-arachnoid serum. Four fluid ounces escaped on removing brain. Pia Mater much congested.	Brain very small; firmer than ordinary; unusually dark externally; many bleeding puncta on section. Convulsions very prominent and well defined. Median band generally well marked. Grey matter in thick layer. Choroid without cysts. About double the usual amount of serum in ventricles. Floor of ventricles rather soft.	Heart very small and greasy, quite pulaceous, readily breaking down between finger and thumb, right side auricle and ventricle much dilated and thinned, left side the same to a less extent; right auricle and ventricle nearly filled by four white fibrinous concretions, adherent to endocardium. Lungs much congested. Slight serous effusion in right pleura.	Liver pale, soft, greasy. Gall bladder immensely distended, with very thick viscid, dark colored bile. Stomach, mucous lining much softened & congested. Bowels contained much hard scybulous matter, healthy. Kidneys very large, twice usual size, soft, friable, greasy; small quantity of purulent matter in pelvis of each, and some scattered purulent deposits in right. Capsule not separable from Cortex. Bladder very firmly contracted; no urine. Uterus much congested. Left ovary showed cicatrix of recent rupture.

TABLE of the relative WEIGHTS of Patients on their admission and discharge.  
1858.]
